KHYATI KIYAWAT

khyati@virginia.edu | khyatikiyawat.github.io | Khyati Kiyawat

Research Focus

Interests: Memory-Centric Architecture, LLM Inference Acceleration, Energy- and Cost-Efficient Systems

My research addresses the memory bottleneck in LLM inference by co-designing processing-in-memory (PIM) and processing-near-memory (PNM) systems, including chiplet-based accelerators and computational CXL devices, with a focus on developing performance modeling frameworks and tools.

Education

University of Virginia, VA, USA 2022–2028 (expected)
Ph.D., Department of Computer Science (Advised by Prof. Kevin Skadron) GPA: 3.88/4.0

Indian Institute of Technology Roorkee, India 2016–2020
B.Tech., Department of Electronics and Communication GPA: 9.23/10.0

Industry Experience

Memory Solution Research Intern | Samsung Semiconductors, USA May 2026–Aug 2026
Mentors: Gongjin Sun, Caroline Kahn

- Characterized the performance of Samsung's CXL-based memory devices as a KV cache offload tier for LLM inference using LMCache and compared them against System DDR and SSD baselines.

Processor Architecture Research Intern | Intel, India May 2024–Jan 2025
Mentors: Shankar Balachandran, Anant V. Nori, Sreenivas Subramoney

- Built a tensor-tracking framework for GenAI workloads that enables rapid exploration of lossless KV cache compression in Xeon LLCs.

Front-end Design Verification Engineer | Texas Instruments, India Summer 2019, Jul 2020–Jul 2022

- Verified SoC integration of registers, communication peripherals, and co-processors for C2000 real-time MCUs.
- Handled critical silicon debugs for functional test patterns on Automatic Test Equipment (ATE).
- Developed a Perl-based automation framework to auto-generate RTL for memory-mapped registers and the verification test cases, significantly cutting manual effort and register-RTL errors by 80%.

Teaching and Mentoring

Graduate Teaching Assistant | University of Virginia, USA
- Computer Systems and Organization I (CS 2130) *Fall 2023*
- Computer Systems and Organization II (CS 3130) *Spring 2024*
- CPU/GPU Memory Systems (CS 6501 Special Topics) *Spring 2025, Spring 2026*

Graduate Mentorship Programs | University of Virginia, USA 2024–present
- Mentoring an undergraduate student on KV cache optimization research for Agentic AI (with Dr. Skadron).
- Mentored a junior PhD student on CS doctoral program navigation (CS Graduate Student Group).
- Mentored a CS undergraduate on graduate school applications (Engineering Grad School Mentor Program).

Rise Together | Charlottesville, Virginia Oct 2023–Apr 2024
- Assisted high-school students in the US with undergraduate college applications and the transition process.

Student Mentorship Programme | IIT Roorkee, India Aug 2018–May 2020
- Mentored 12 first-year students in their transition and adjustment to the institute's culture.

Honors and Awards

- **Most Memorable Internship Project** | Samsung Semiconductors Intern Showcase *Aug 2026*
- **Best Demo Award** | JUMP 2.0 PRISM Annual Review *Nov 2025*
- **Selected Participant** | CRA-WP Grad Cohort Workshop for Women *2023*
- **Engineering Distinguished Fellowship** | University of Virginia, awarded to top Ph.D. applicants *2022*
- **Semi-finalist** | Swadeshi Microprocessor Challenge, RISC-V autonomous distress system *2020–21*
- **Honda Y-E-S Award** | 1 of 14 recipients across 6 IITs; Y-E-S Plus Scholarship *2018–19*
- **Quarter-finalist** | TI India Innovation Challenge Design Contest (IICDC) *2018*
- **1988 Batch Award** | IIT Roorkee, top undergraduate by academic merit *2017*

Service

Artifact Evaluation Committee | ISCA 2024, 2025
- Reviewed research artifacts accompanying accepted papers.

Steering Committee Member | Computer Architecture Student Association (CASA) 2025
- Leading the Computer Architecture Long-term Mentorship (CALM) program.

Systems Interest Group (SIG) | University of Virginia Nov 2022–May 2024
- Organized cross-departmental systems research forum, facilitating faculty-student discussions.

Community Outreach | IIT Roorkee, India
- **Unnat Bharat Abhiyan**: Surveyed farming challenges in partner villages under a national program that pairs IITs with rural communities, and designed a sensing system to protect farms from wild animals *(2016–18)*.
- **SOPAN**: Ran weekly outreach for primary and middle school students in rural Uttarakhand *(2018–20)*.

Presentations

- Reimagining LLM inference with Memory-centric Servers at *ORNL Core Universities AI Workshop 2026*.
- Open-Source Processing-In-Memory (PIM) Architecture Design through FPGA Emulation: A Case Study Modeling Sieve at *Open-Source Computer Architecture Research Workshop* [OSCAR @ ISCA 2023].
- PIMperf: Analytical Modeling for SIMD Instructions on PIM at *CAPWIC 2024*.
- Chiplet-based DRAM PIM Architecture for LLM Inference at *TECHCON 2024*.
